

## EDUCATION

---

- **Utah State University** Logan, UT  
*Computational Mathematics (BS); GPA: 3.88* *Aug. 2015 – Dec 2018*
- **Cuesta College** San Luis Obispo, CA  
*Three semesters to transfer; GPA: 3.95* *Jan. 2014 – May. 2015*

## EXPERIENCE

---

- **Atomic Jolt** Logan, UT  
*Software Engineer* *June 2018 - Present*
  - **Learnosity Connector**: Contributed to the Learnosity Connector project which enables teachers to author course content in Canvas via the popular Learnosity service.
- **USU Power Electronics Laboratory** Logan, UT  
*Software Engineer / Research Assistant* *Jan 2016 - Jun 2018*
  - **Square One - Altium Library Management System**: Created a system using Node+Express for mass-submitting tickets for new parts to be added to our in-house Altium Database and verified by librarians.
  - **CAN Data Graphing Utility**: Created an HTML5 asynchronous web-app for generating and sharing graphs of terabytes of data accrued in the AMPED battery life extension project.
  - **Graphic Design**: Designed all the banners and window decals around our facilities in Logan, UT. Utilized a unified color palette for all the facets of our organization.
- **USU GASLab** Logan, UT  
*Volunteer Software Engineer* *Apr 2017 - Present*
  - **Cubium Software Project**: A volunteer of the Get-Away-Special small-satellite program at Utah State University. Develops open source subscription-based plug and play software for small satellite application as well as new hardware that will empower individuals to deploy experiments on a budget.
- **West Coast Astronomical Society** Santa Margarita, CA  
*Head of Mechatronics* *Jun 2014 - Jan 2015*
  - **Telescope Automation**: Took charge of automating the hardware of a Meade 10" telescope to more accurately detect the positions of binary star systems.
- **Cuesta College** San Luis Obispo, CA  
*Tutor* *Aug. 2014 – May. 2015*
  - **Math / Physics Tutor**: Tutored all levels of mathematics. Teachers frequently sent students to me so that I could explain new concepts to them.

## ACHIEVEMENTS

---

- **USU - Magna Cum Laude**: Graduated Magna Cum Laude in the Computational Mathematics program at USU
- **USU Hackathon (2018)**: Took first place for the third time in a row at the Utah State University intercollegiate hackathon for a Neural Network that can read D'ni numbers.
- **Cuesta College FBSA (2015)**: Awarded the Frank Brown Science Award for outstanding academic achievement.

## PROJECTS

---

- **8 Bit Spaghetti**: Designed and built 8-bit processor using TTL. Helped many students around the world build versions of the design.
- **Dream Cloak LED Display**: Designed and built a 15x30 24-bit wearable RGB LED display and a web app to control it wirelessly, all in five days.
- **Euler Golf**: Created an HTML5 game based on a problem conceived involving recursive movement over the Gaussian Integers.

## PROGRAMMING SKILLS

---

- **Languages**: JS, C++, Python, Bash, Java, PHP, Haskell, LaTeX
- **Technologies**: React, GraphQL, Node.js, Express, Tensorflow, Numpy
